Checker Block® Features & Benefits:

- Steel-reinforced, 4" thick, heavy-duty slab with thick webs, ideal for commercial application.
- Pervious concrete grid.
- Approved for H-20 loading for parking, service roads, tree pits, and fire lanes. It is also ideal for stabilizing embankments along streams, rivers, and lakes.
- LEED® credit potential: Open grid pavement with an SRI > 29; stormwater runoff reduction; and regional materials.
- Checker Block is manufactured in accordance with ASTM 1319, (Standard Specification for Concrete Grid Paving Units) which requires a minimum compressive strength of 5,000 psi.
- Large surface void area allows for significant turf establishment (not always feasible with plastic or Turfstone products).

NICOLOCK

We're paving a whole new way.

checker block®

Strength plus nature's beauty.

The unique waffle-like configuration of this pervious castelated product provides significant grass coverage when properly filled with topsoil.

Each 4 square foot unit is 4" thick, and provides a 75% grass to concrete ratio (ratio measured by each 4 s.f. section), ensuring a green turf that can support significant vehicular loads.
