PERMEABLE PAVEMENT SYSTEMS

Ledgestone Permeable 3-Pc. Design Kit & Aqua-Bric Type 1 with ArmorTec are specially designed for rapid removal of stormwater. Minimal openings make walking more comfortable while allowing for natural stormwater drainage and groundwater recharge. Retention ponds are eliminated. Maximum strength for driveways, parking lots and roads with key ecological benefits, curb appeal and convenient access for maintenance. Aqua-Bric is also available in The Renaissance Collection. **The Belgium Cast Stone 5-Pc. Design Kit & Turfstone are also designed for permeable applications.**

Pavingstones are laid out in a variety of patterns with gravel between them. Below the pavers typically sits a 12 in. to 24 in. sub-base of stones (depth requirements vary), a 4 in. deep base of 1/4 in. to 1/2 in. clean gravel, and a 2 in. bedding sand of 1/8 in. to 1/2 in. grits (see diagram).
